

**2007 Nebraska Research and Innovation Conference
Student Poster Competition Winners**

The following five first student authors won the 2007 student poster competition and will each receive an award of \$200:

Huimin Geng, Poster 116 : "Prediction of Regions of Chromosomal Alterations from Gene Expression Profiling in Natural Killer Cell Lymphoma" (University of Nebraska Medical Center);

Benjamin Currall, Poster 117: "Interactions of Inner Ear Proteins Prestin and GLUT5 Studied with a Novel Fluorescence Lifetime Imaging Method (apFLIM)" (Creighton);

Amit Tuli, Poster 209: Amyloid Precursor-Like Protein 2 Regulates Surface Expression of MHC Class 1 Molecules in Pancreatic and Breast Tumor Cells (University of Nebraska Medical Center);

Ganesh Suranarayanan, Poster 243: Molecular Interactions between the Lectin Domain of GalNAc Transferase T2 and MUC1 Tandem Repeat Glycopeptides (University of Nebraska Medical Center);

Kimberly Kirchner, Poster 601: Measuring Angular Correlation of Neutrons Emitted in Giant Dipole Resonance Decay from Ultra Peripheral Collisions of Relativistic Heavy Ions (Creighton)
