

NSF Nuggets Form

Project Title:

Investigators (please use full names):

Institution of Primary Investigator (do not use acronyms or abbreviations):

Describe the work done under this award in terms understandable to a lay audience. Avoid technical terms. Do not use formulae. Include work that is related to the NSF's Government Performance Results Act (GPRA) , available at www.nsf.gov/od/gpra/perfplan/fy2003/FY2003RevisedFinalPlan.pdf.

Include, where appropriate, information on the following topics:

NSF Priority Areas (Nanoscale S&T, Biocomplexity & the Environment, Information Technology Research, and Learning for the 21st Century);

EHR and EPSCoR Areas of Special Interest (Economic Development, Homeland Security, Integration of Research and Education, Support of Minorities and Underepresented Groups, Broadening Institutional Participation, and EPSCoR Development).

Descriptions of over 150 words may be cut.

Outputs/Outcomes/Impacts

Describe products, scientific advances, or other outcomes of the activity that relate to NSF GPRA goals. Include output (immediate, observable results of an activity), outcomes (longer-term results in the form of processes or things), and impacts (long-range project consequences like collaborations, awards, or other achievements).

Include, where appropriate, information on the following topics:

NSF Priority Areas (Nanoscale S&T, Biocomplexity & the Environment, Information Technology Research, Learning for the 21st Century, and Mathematical Sciences);

EHR and EPSCoR Areas of Special Interest (Economic Development, Homeland Security, Integration of Research and Education, Support of Minorities and Underrepresented Groups, Broadening Institutional Participation, and EPSCoR Development).

Principal Citation (optional): Enter full bibliographies for one or two major research publications resulting from this project/award.

Subsequent Grants and Honors (optional): Enter any subsequent research grants that built upon the research on which you are reporting as well as national or international prizes or honors received as a result of that research. For **Research Grants**, list the organization giving the grant, the total dollar amount of the grant over its lifetime, a short title, and the PI's name. Do not list subsequent grants received from NSF EPSCoR or any other agency's EPSCoR-like program. For **Prizes and Honors**, include the name of the awarding organization, the name of the prize/honor, and any monetary award. Also, give a description of the scope of or competition for the prize/honor (e.g., it is given to two researchers world-wide out of 10,000 eligible).
